Finding High Quality, Custom Colored Floor Joint Fillers and Concrete Repair Products is No Longer a Gray Area...

Traditionally industrial floor joint fillers and repair products have existed in a black and white world, available in perhaps one or two shades of gray to be used in "gray" concrete floors. But with many retailers, grocers and others choosing to use stained and polished concrete floors as their showroom floor and worksurface, "concrete gray" just won't do. That's why we offer our joint fillers and repair products in a virtually limitless variety of custom colors.

As the industry leader in floor joint protection, Metzger/McGuire takes floor joint filler and repair product technology seriously, and color matching is no exception. We use a custom blending process and perform multiple color consistency checks during the manufacturing process to ensure that every gallon of material we make meets your color expectations as well as the consistent, high quality standards you expect from any Metzger/McGuire product.

Getting a custom matched product is easy, just follow the steps listed and you'll be on your way to getting your custom colored products in no time. Whether you are looking for 1 gallon or 1,000, you can rely on Metzger/McGuire to provide you with accurate, custom color matched joint fillers and repair products for your next project.

STEP 1 - Provide Color to Match

Send hard color sample

Choose from one of our Popular Colors

Provide color number/name to match from any of the following sources:

- Pantone Formula Guide
- Pantone Paints and Interiors
- Sherwin Williams Paint Chart
- Benjamin Moore Paint Chart

STEP 2 - Sample or No Sample?

Request liquid or hard samples of the colored material you require or

Skip sample step and order product to be produced

Upon approval custom colored materials are non-returnable

STEP 3 - Quantity and Packaging?

Tell us the quantity needed and desired packaging (i.e. dual cartridge sets, 1 gal or bulk units?)

Min. Order Size: Cartridges - 6 , Bulk 1 gal.

STEP 4 - Pricing and Production

Once we have color approval and order size we will provide you with a firm shipping date for your materials.

Typical Production Time: 5 Working Days or Less

Products Available in Custom Colors:

Fast Set, Low Viscosity Structural Concrete Repair Polymer

Custom Color Charges:

Typical custom color match charge is a flat \$125 for new orders, \$75 for re-orders or Popular Colors, regardless of product quantity. Color charges are waived for orders over 50 gallons.

Discounts may apply for certain colors and quantities, contact Metzger/McGuire for more details.
